Motorola 68HC908GP32 Development Kit emWare® Enabled

The Motorola 68HC908GP32 emWare® Enabled Development Kit combines all the features and functionality of Motorola's 68HC908GP32 8-bit FLASH microcontroller with emWare's EMIT® device networking software to provide a powerful, low-cost development solution. emWare's EMIT device networking technology is a complete software infrastructure that allows system designers to produce intelligent devices that can be monitored, managed, and/or controlled remotely over the Internet or any other network, while adding as little as 1KB of code.

Available exclusively from Avnet Design Services, the Motorola 68HC908GP32 emWare Enabled Development Kit also doubles as a microcontroller target system, significantly reducing designer development requirements and product time-to-market.

The Motorola 68HC908GP32 emWare Enabled Development Kit includes:

- Motorola emWare Enabled Development Kit
 - Functional Demonstration Application
 - Assembler/Debugger
 - Documentation
- emWare's EMIT 4 device networking software
 - MetroWerks Code Warrior Integrated Development Environment including C-compiler
 - 9V external power supply

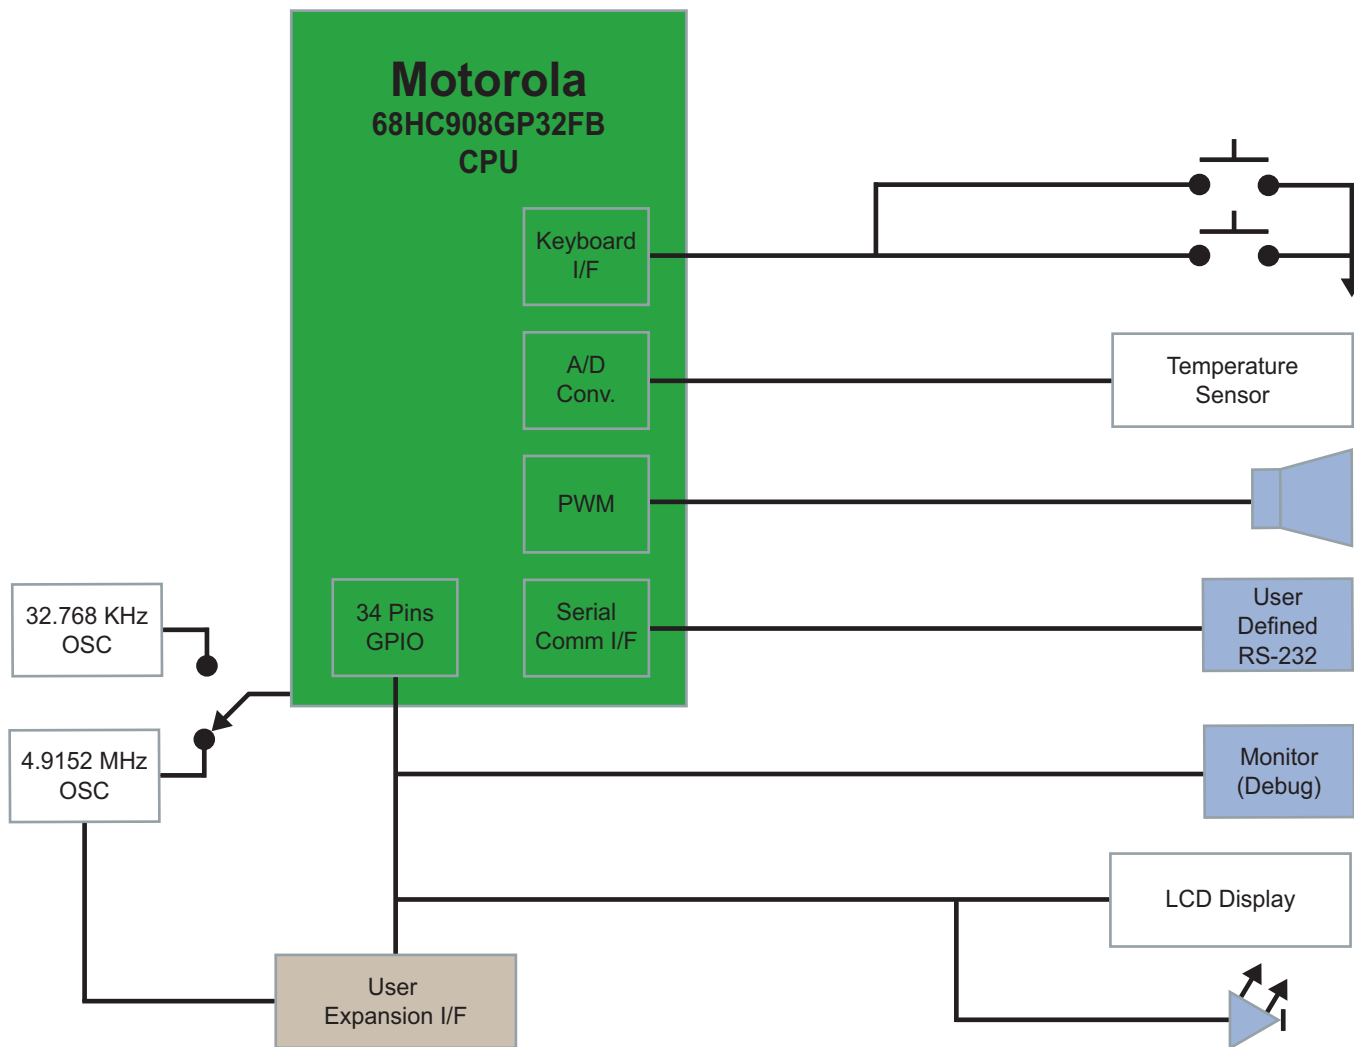

Features:

- ▲ Motorola 68HC908GP32 8-bit FLASH microcontroller
- ▲ 1x16 character LCD
- ▲ Temperature sensor
- ▲ Piezoelectric speaker
- ▲ RS-232 serial interface
- ▲ 9V external power supply
- ▲ Onboard 5V voltage regulator
- ▲ emWare's emMicro™ object server
- ▲ emNet™ lightweight device network protocol
- ▲ emGateway™ network bridge and management system
- ▲ EMITAIS™ client libraries for creating client applications

Target Applications:

- ▲ White goods (washing machines, dishwashers, clothes dryers, etc.)
- ▲ Factory automation
- ▲ Security systems
- ▲ Lighting systems
- ▲ Electronic vending machines
- ▲ Non-critical medical devices
- ▲ Power meters
- ▲ VCRs and home entertainment
- ▲ Set-top boxes
- ▲ Building control
- ▲ Instrumentation
