

The Xilinx CoolRunner™-II Evaluation Kit from Avnet Design Services speeds time to market for designers, offering a platform to develop and test products that are targeted to the Xilinx CoolRunner-II CPLD family. The CoolRunner-II offers high performance and ultra low power consumption in a single device without compromises. With less than 100 μ A of standby current, CoolRunner-II is a perfect solution for any new system. The kit features a serial A/D converter, which displays the CPLD current consumption, RS-232, user interface, and AvBus expansion capability.

The Xilinx CoolRunner-II Evaluation Kit includes:

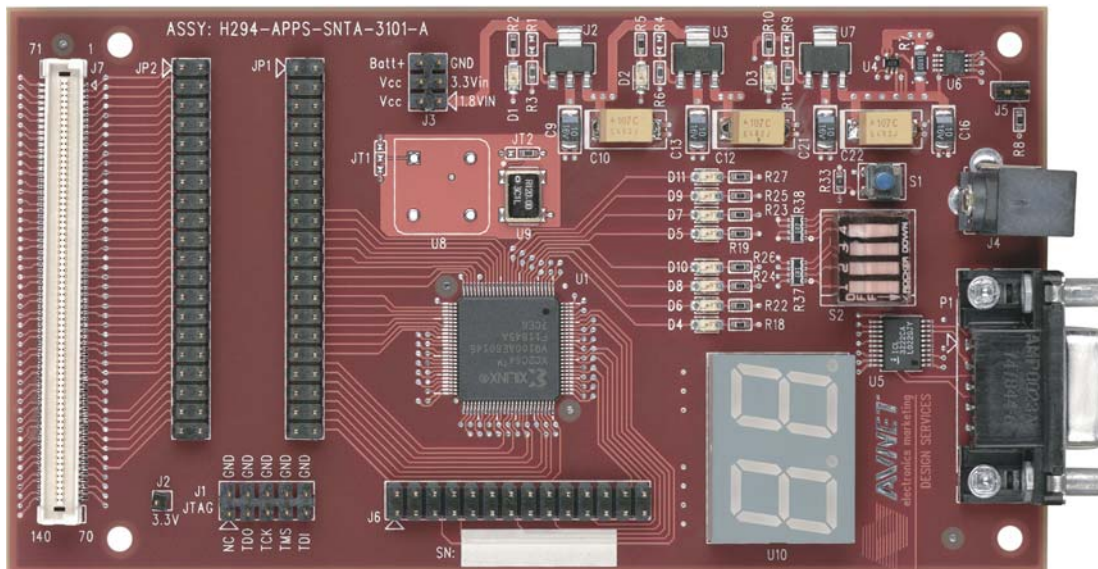

- Xilinx CoolRunner-II evaluation board
 - Users guide
 - Bill of materials
 - Schematics
- Source code for sample designs
 - Power supply

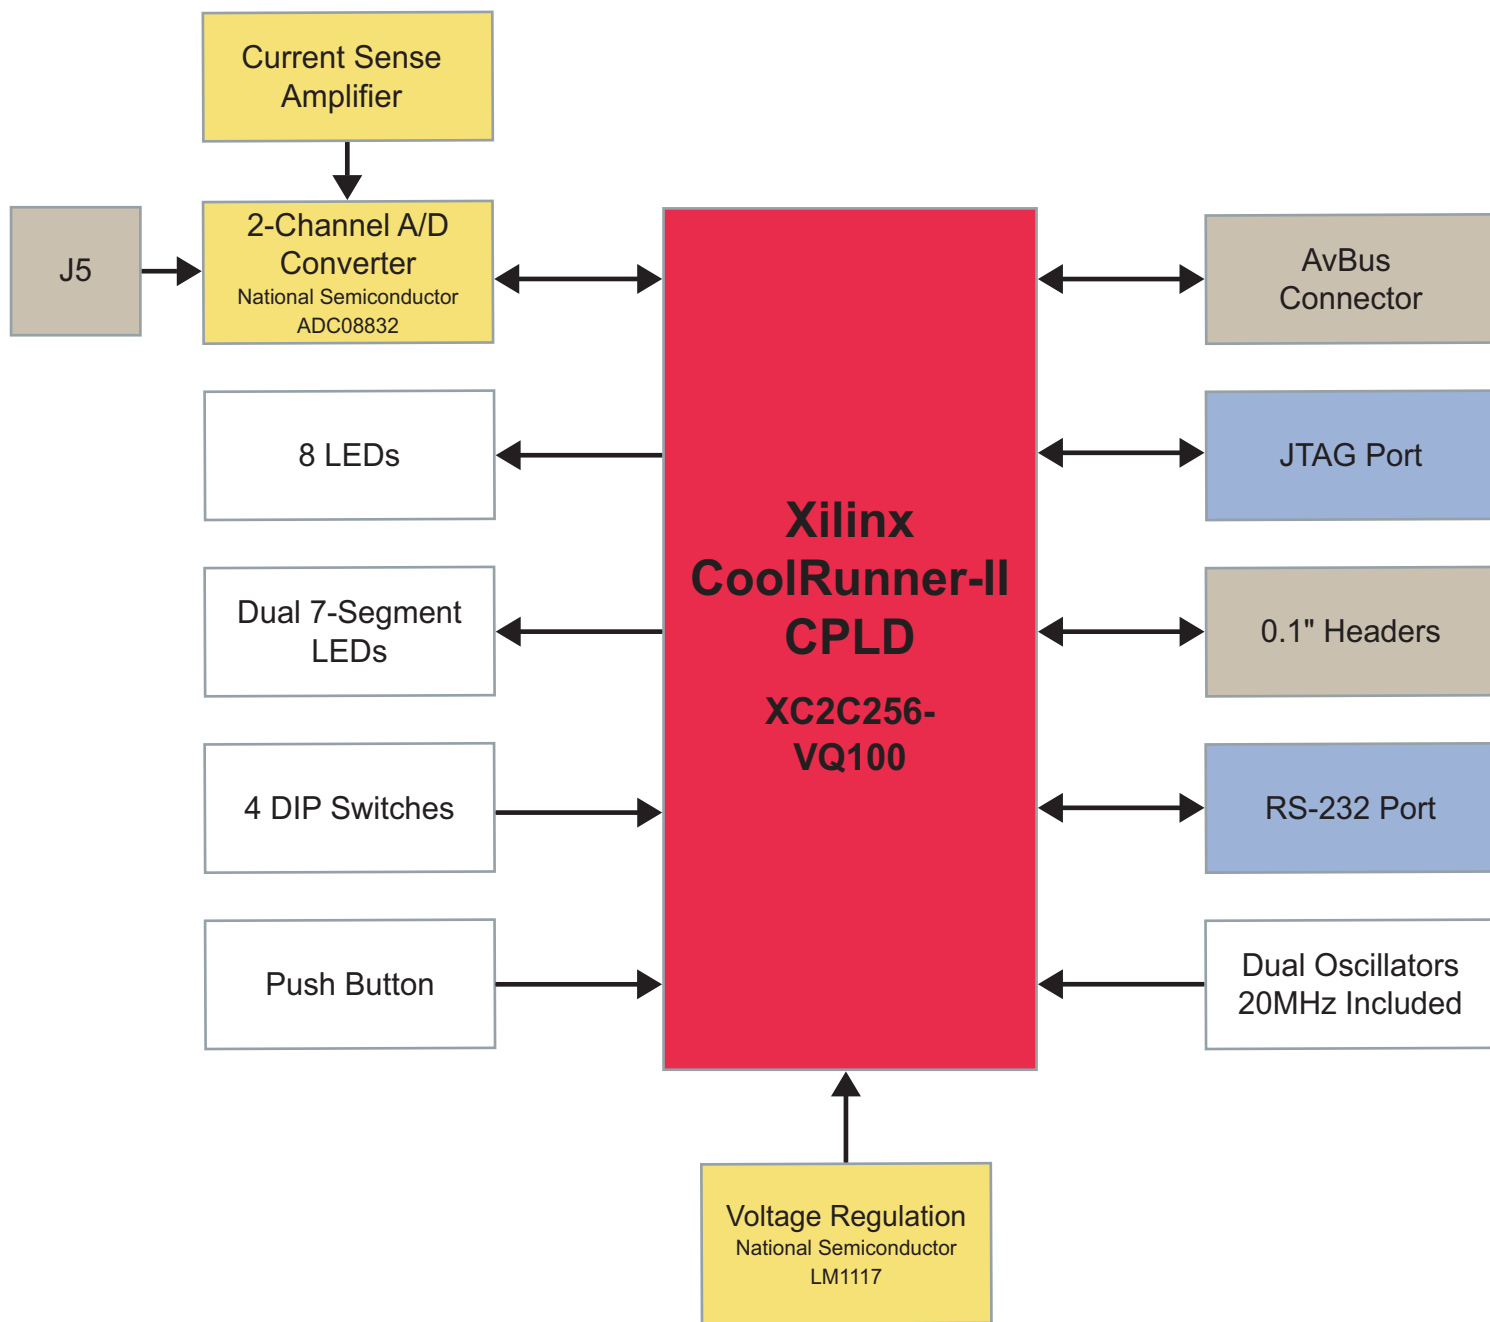

Features:

- ▲ Xilinx XC2C256-VQ100 CoolRunner-II CPLD
- ▲ Serial A/D converter
- ▲ Regulated 3.3V and 1.8V supply voltages generated from external 5V supply
- ▲ JTAG Port
- ▲ AvBus I/O expansion connector
- ▲ Header connectors for user access to CPLD I/O
- ▲ Dual-digit 7-segment LED display
- ▲ 4 DIP switches
- ▲ 1 push-button
- ▲ RS-232 port

Target Applications:

- ▲ Battery powered systems
- ▲ Low power designs
- ▲ High performance portable designs
- ▲ Advanced I/O designs
