

## Xilinx Virtex™ -II High-Speed Evaluation Kit

Engineers use the Xilinx Virtex-II High-Speed Evaluation Kit from Avnet Design Services as a platform to develop and test designs that are targeted to the Xilinx Virtex-II FPGA family. The kit provides a stable development and prototyping environment that can help shorten and simplify your design cycle. A Xilinx XC2V40 device, capable of implementing over 40,000 system gates, is installed as the target for your designs.

Thorough application notes make use of the hardware features of the evaluation board to demonstrate many of the advanced benefits of the Virtex-II family, including:

- Select I/O with support for a wide variety of I/O signaling standards including Low Voltage Differential Signaling (LVDS)
- Digital Clock Manager (DCM) for frequency synthesis and control of clock skew and phase
- Xilinx Controlled Impedance Technology (XCITE) for termination of high-speed signals without the use of external termination resistors
- SelectRAM™ featuring true dual-port operation
- Data Encryption Standard (DES) support for design security

The Virtex-II High-Speed Evaluation Kit and engineering consulting services from Avnet Design Services help you get to market faster and easier than ever before.

### Features:

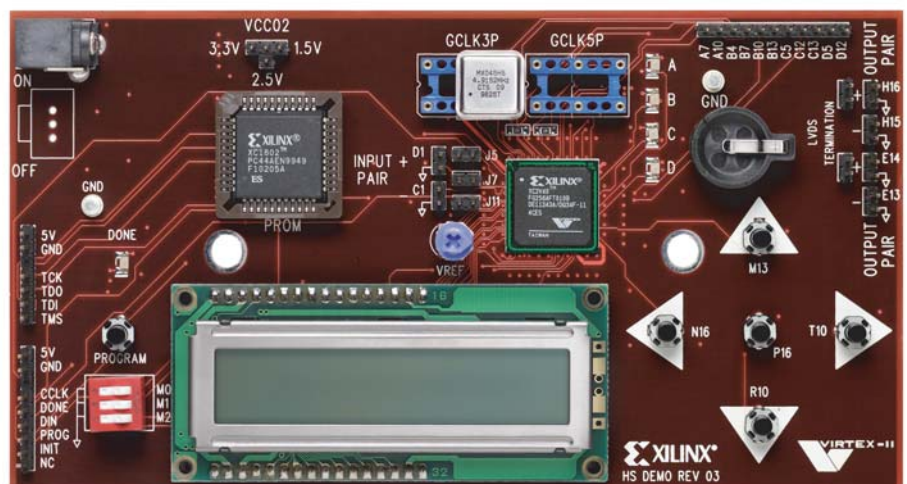

- ▲ Xilinx XC2V40 Virtex-II FPGA
- ▲ Xilinx XC18V02 configuration PROM
- ▲ Regulated 3.3V, 2.5V and 1.5V supply voltages generated from external 5V supply
- ▲ 2 oscillator sockets
- ▲ 50MHz oscillator
- ▲ JTAG port
- ▲ Slave-serial configuration port
- ▲ FPGA configuration mode selected via DIP switch
- ▲ Connectors for access to FPGA I/O, including differential input and output pairs with selectable termination and I/O voltages
- ▲ Coin cell holder
- ▲ 16 character by 1 line LCD display
- ▲ 4 LEDs
- ▲ 5 push-buttons

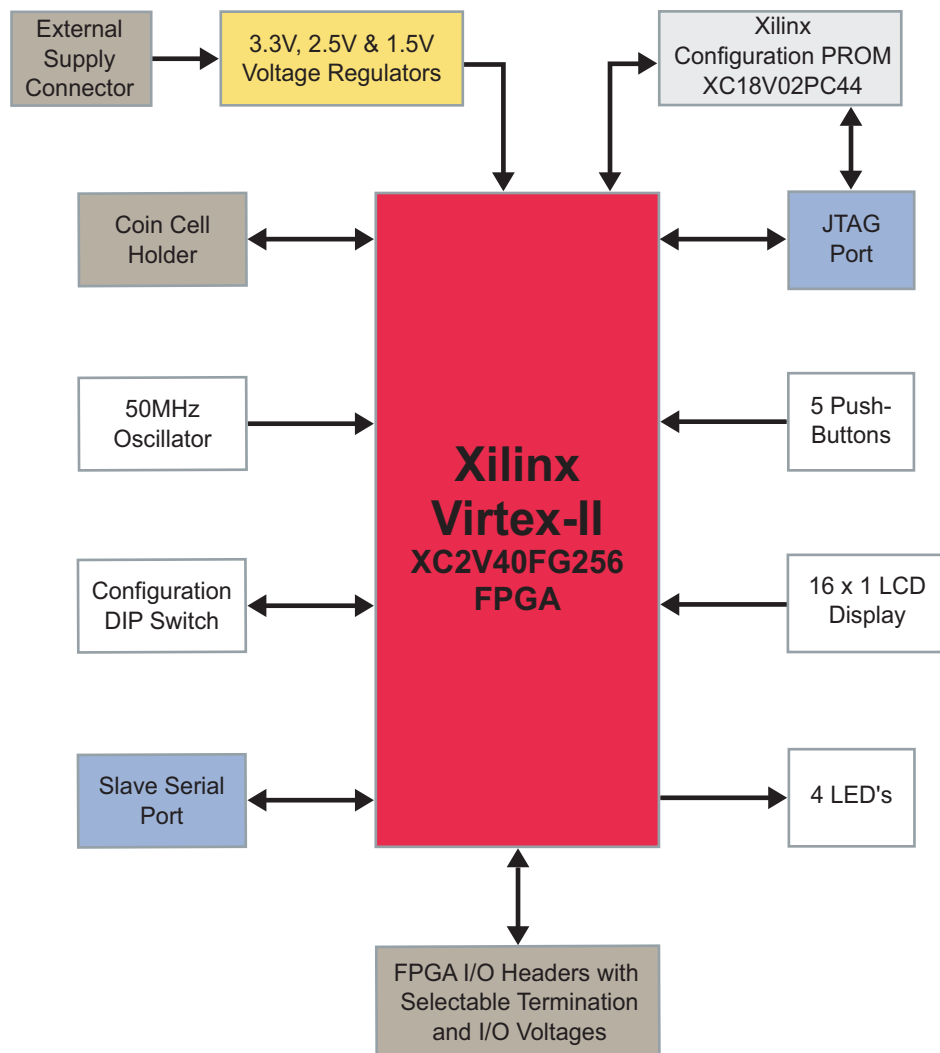

### Target Applications:

- ▲ Data transmission
- ▲ System connectivity
- ▲ Secure designs
- ▲ Digital signal processing
- ▲ High-speed designs with critical clocking requirements

### The Xilinx Virtex-II High-Speed Evaluation Kit includes:

- Xilinx Virtex-II high-speed evaluation board
  - User's guide
  - Bill of materials
  - Schematics
- Source code for sample designs
