

The Audio/Video Module from Avnet Design Services speeds time to market for designers, offering a platform to develop and test products that are targeted to an audio and/or video environment. The Audio/Video Module will connect to a host via a standard AvBus connector and will provide video interfaces to accommodate different RGB monitors and LCD panels, as well as standard definition television monitors. The Audio/Video Module also provides the ability to capture composite video, and an audio CODEC is provided to facilitate audio processing. A PS2 keyboard and mouse interface is provided as well as a touchscreen controller.

Features:

- ▲ Philips SAA7111A enhanced video input processor
- ▲ Philips SAA7121H digital video encoder
- ▲ Analog Devices ADV7123 triple high-speed video DAC
- ▲ Philips UCB1400 20-bit audio CODEC
- ▲ AvBus expansion connectors
- ▲ LVDS interface
- ▲ X/Y touchscreen controller
- ▲ PS2 keyboard and mouse interfaces
- ▲ Downloadable VHDL source for sample applications

Target Applications:

- ▲ Consumer
- ▲ Industrial
- ▲ Digital convergence products

The Audio/Video Module includes:

- Audio/Video Module
 - User's guide
 - Bill of materials
 - Schematics
