

The Avnet Design Services Xilinx® PCI Mezzanine Card (PMC) Internet Reconfigurable Logic (IRL) Reference Design Kit provides the user with a complete development environment on which PAVE Framework and other IRL applications can be developed. Designers can begin development immediately on a flexible hardware platform using a working software environment- dramatically cutting time to market for IRL based applications. Included in the kit is a powerful Virtex-II based FPGA board that includes sufficient memory and interfaces to cover most applications requirements, the PAVE Framework software toolset which provides an easy to use set of standard IRL software modules and interfaces, documentation, schematics and a bill of materials so all or part of the design can be easily included in a final design.

The Xilinx PMC IRL reference design kit includes:

- Durango PMC IRL board
- Durango Flipper board
 - User's guide
 - Schematics
- Bill of materials

Features:

- ▲ FPGAs
- ▲ Xilinx Virtex-IITM 2V1000-4FG456C/FF896C
- ▲ Board I/O connectors
- ▲ 32-bit, PMC Bus interface connector
- ▲ PowerPC connector
- ▲ JTAG connectors (2)
- ▲ SelectMap connector
- ▲ AvBus I/O connector
- ▲ Memory
- ▲ 16MB SDRAMs (2)
- ▲ 512Kb×18 QDR SRAMs (6)
- ▲ 2MB parallel FLASH memory
- ▲ 4MB serial FLASH memories (2)
- ▲ Miscellaneous
- ▲ DIP switches, LEDs, push buttons

Target Applications:

- ▲ Internet Reconfigurable Logic (IRL™)
- ▲ Networking
- ▲ Telecommunications
- ▲ Computing
- ▲ Consumer
- ▲ Industrial

Ordering Information:

Part Number	Hardware	Resale
ADS-XLX-PMC-IRL	Xilinx PMC IRL Reference Design Kit	\$2,495.00 USD
