

Enhance your engineering productivity and accelerate your time to market with the Xilinx Virtex™-II evaluation kit from Avnet Design Services. The Virtex-II kit delivers a stable platform to develop and test designs targeted to the highly advanced Xilinx Virtex-II FPGA family. The installed XC2V1000 device offers a 1,000,000 system gate prototyping environment to effectively demonstrate the enhanced benefits of the leading-edge Xilinx FPGA solution. Embedded multipliers, advanced digital clock management, built-in impedance matching, IP immersion, and other exciting features can be implemented with advanced Xilinx design tools. Demonstration VHDL code is included with the kit to exercise standard peripherals on the evaluation board for a quick start to device familiarization. Let Avnet Design Services shorten your design cycle with the Virtex-II evaluation kit and our expert engineering design services.

The Xilinx Virtex-II Evaluation Kit includes:

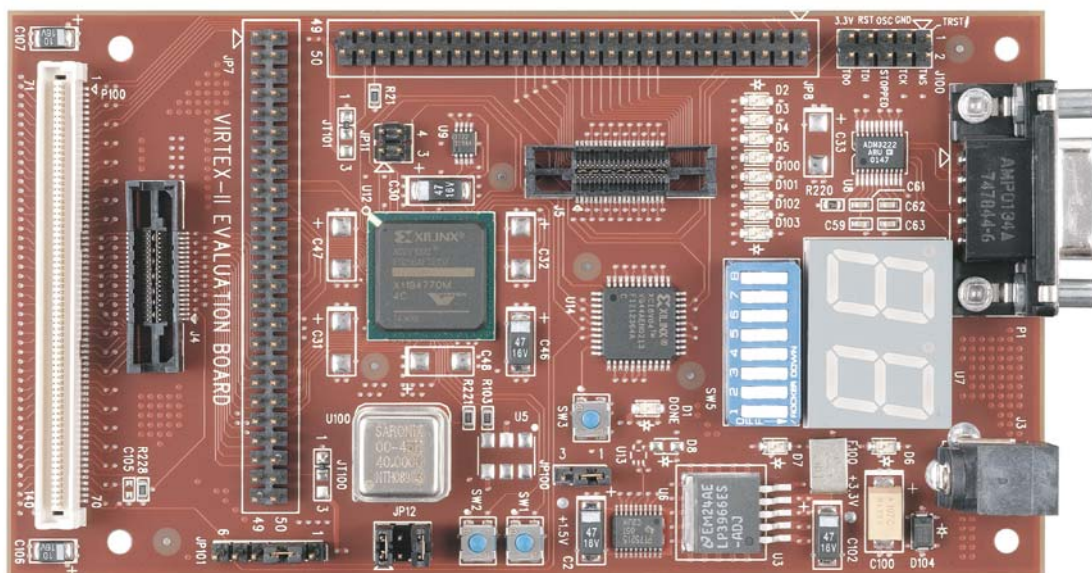

- Xilinx Virtex-II evaluation board
 - User's guide
 - Schematic
 - Bill of materials
- VHDL source code for sample design

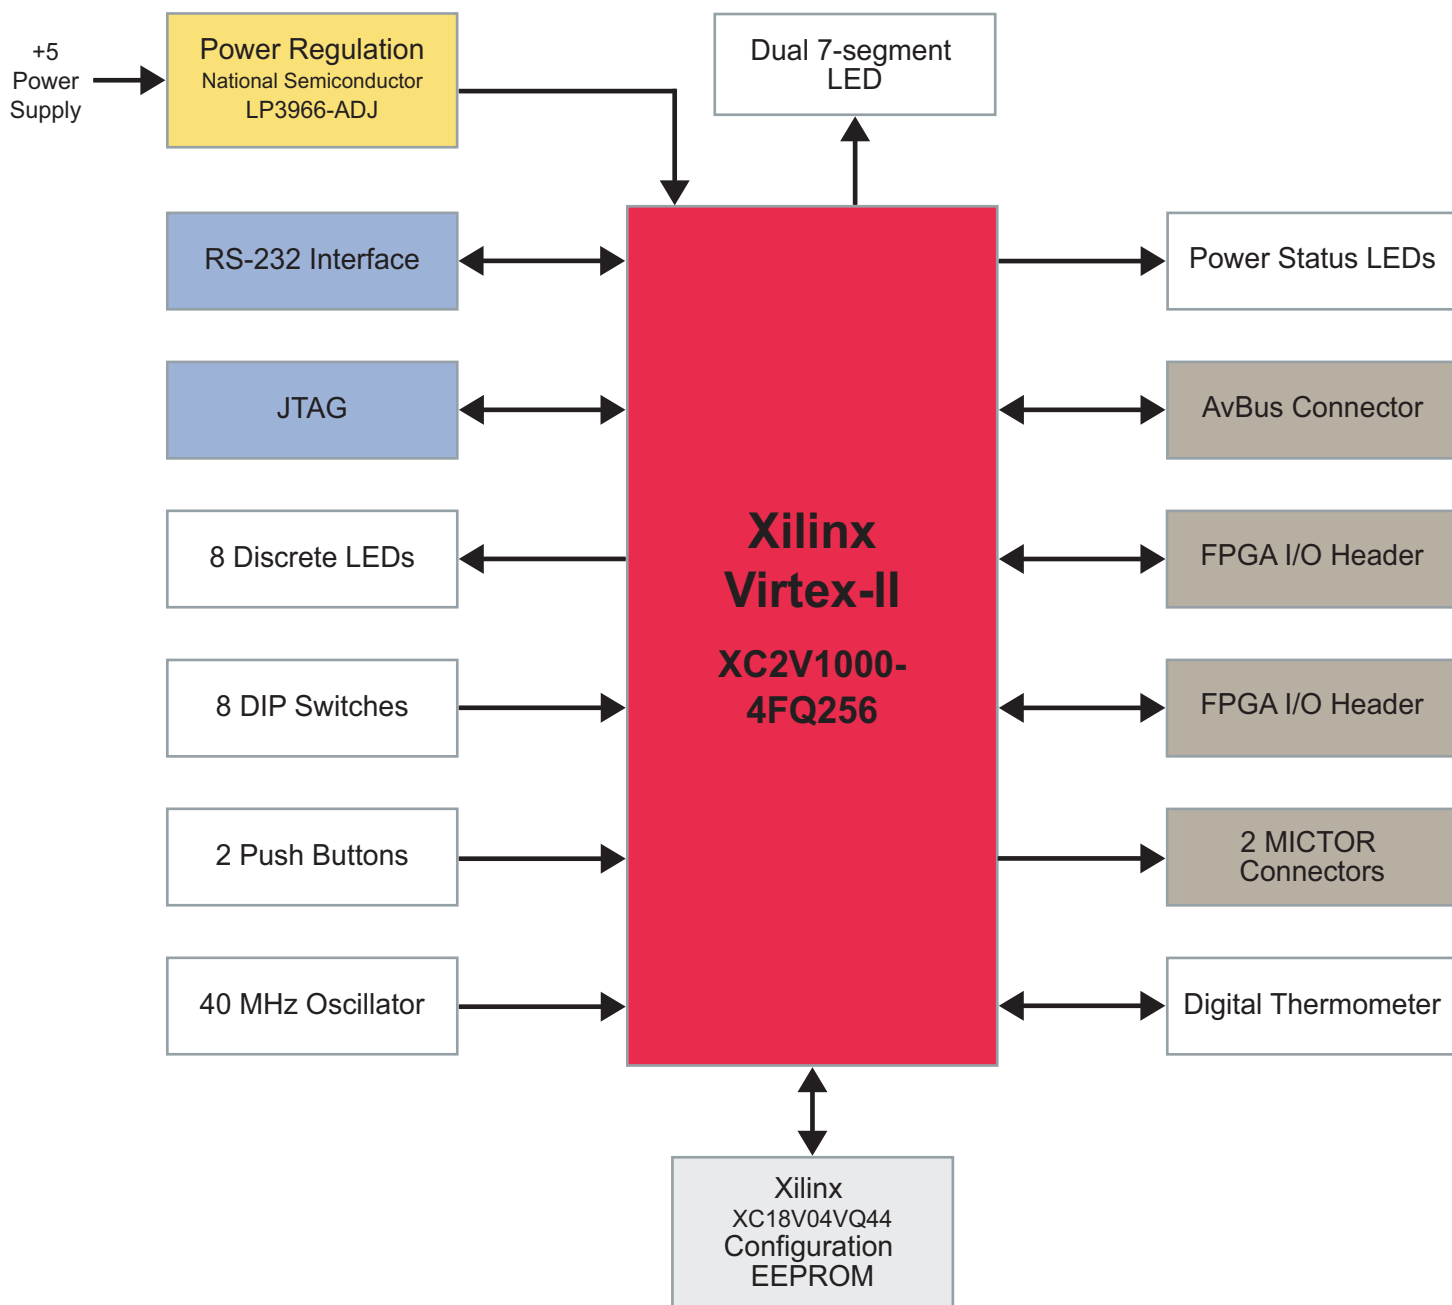

Features:

- ▲ Xilinx XC2V1000-4FG256 Virtex-II FPGA (256 fine pitch BGA)
- ▲ Xilinx XC18V04VQ44 configuration PROM
- ▲ Regulated +3.3 VDC and +1.5 VDC supplies generated from external +5.0 VDC source
- ▲ 40 MHz oscillator (socketed)
- ▲ JTAG port
- ▲ Connectors are provided for FPGA I/O, logic analyzer, and AvBus interfaces
- ▲ 8 DIP switches
- ▲ 2 push buttons
- ▲ Dual-digit 7-segment LED
- ▲ Demonstrations of RS-232 port, digital thermometer and LED pattern generator
- ▲ 8 discrete LEDs
- ▲ 101 user I/O available

Target Applications:

- ▲ High-end DSP
- ▲ Data transmission and manipulation
- ▲ IP based systems
- ▲ System connectivity
- ▲ High density ASIC replacement
