EMERGING APPLICATIONS

Changing Lifestyle Choices

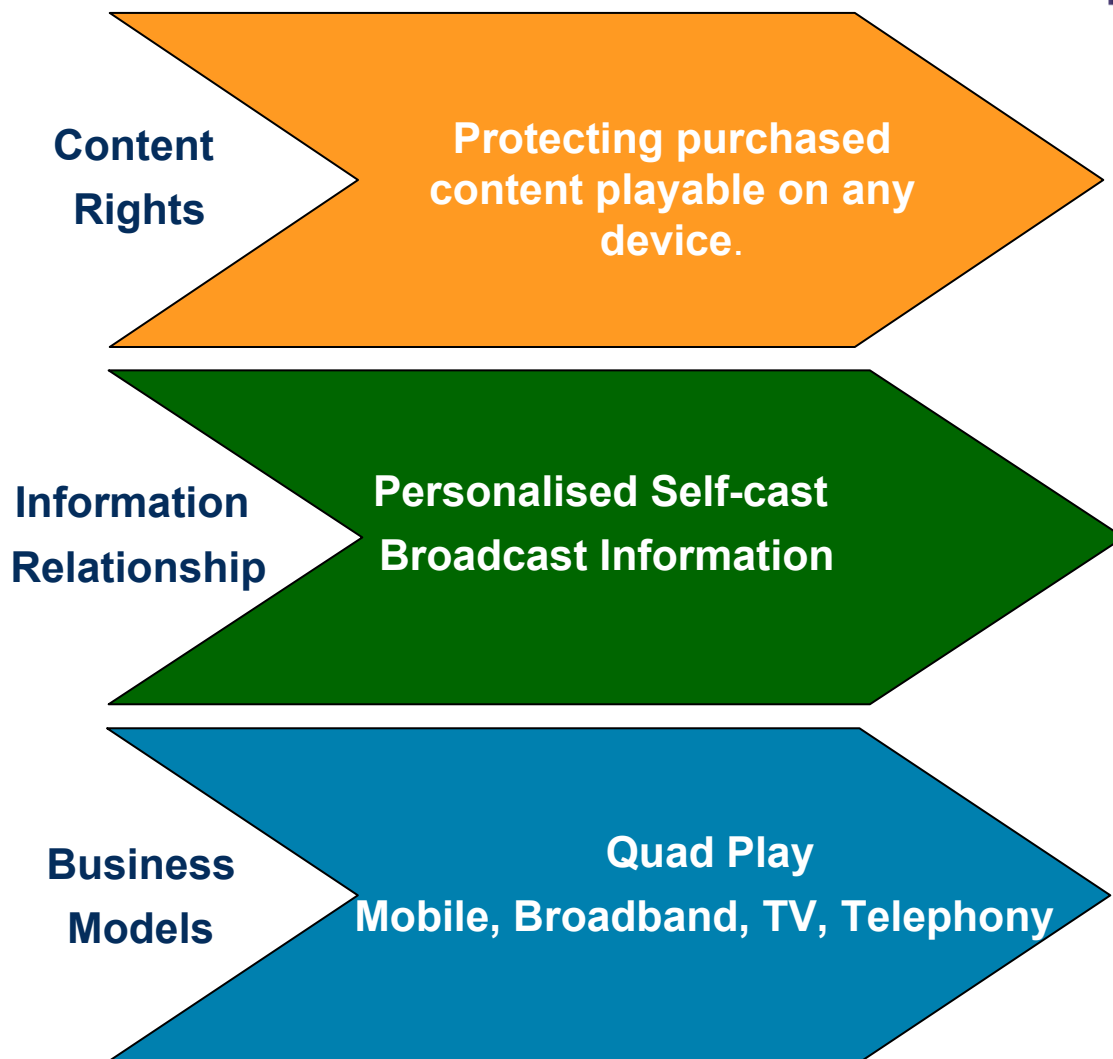

Convergence is Happening Across Segments

- Standards encourage convergence
 - Content rights
 - Multimedia formats
 - Connectivity
- HW technology advances
 - High-performance processing and low-power are becoming one
 - Major building blocks are moving from “art” to “standard IP”

Ecosystem

Rapid Integration
Low Risk

- High Performance
 - Performance bar is raising – rich media experiences are requiring higher performing solutions
 - Scalable, software compatible architecture.
- Low Power
 - Standby modes still consuming too much power
 - Reduced package costs
 - Manufacturers differentiate products by running cost
- Security
 - Protecting valuable content whilst enabling new delivery choices.
 - Consumers want to enjoy content anytime anywhere
 - Multiple DRM co-existing on same product.
 - Sharing content across multiple devices in the home
