

ARM Physical IP Overview

James Lee

Physical IP Products On An SoC

Pervasive SoC IP

- Library platforms
 - Standard cells
 - Embedded memory
 - I/O functionality
- High-speed interfaces
 - DDR
 - Serial PHYs

Physical IP Products

Classic	Advantage™	Metro™	Velocity™
Mainstream Platform	Performance Platform	Low Power Platform	High-Speed PHYs
SAGE-X™ Standard Cell	Advantage Standard Cell	Metro Standard Cell	PCI-Express
Single/Dual Port SRAM	Single/Dual Port SRAM	Single/Dual Port SRAM	Serial-ATA
1/2-Port Register File	1/2-Port Register File	1/2-Port Register File	XAUI
ROM Via or Diffusion	ROM Via or Diffusion	ROM Via or Diffusion	DDR/DDR2/GDDR3
GPIO Inline/Staggered	GPIO Inline/Staggered	GPIO Inline/Staggered	
	Power Management Kit	Power Management Kit	
Analog/Mixed Signal PLLs, DLLs Specialty I/Os	Analog/Mixed Signal PLLs, DLLs Specialty I/Os	Analog/Mixed Signal PLL, VREG, OSC, Specialty I/Os	

Free and Custom Products

- Access Library Products (Free Products)
 - Optimized for mix of speed and density
 - License fees paid by Foundry
 - Royalties paid by Foundry
 - Targeted to meet needs of largest segment of COT customer base
 - EULA is needed to download free products
- Application Specific Products (Custom Products)
 - Optimized for power or speed
 - License fees paid by End User
 - Meets specific requirements of smaller segments of market

EULA (End User License Agreement)

- Procedure
 1. Download EULA form from the web site (www.artisan.com)
 2. Send the form to ARM after fill & sign (by fax)
 3. ARM Internal procedure
 4. Approval
 5. Download Libraries
- For each foundry, each EULA is needed
- EULA is Master agreement for other application specific product

ARM Artisan Physical IP End User License Agreement
For Standard Cells, I/Os and Memory Generators
Optimized For TSMC Processes

ARM

"Licensee"		"Licensor"	
Name:	_____	ARM Physical IP, Inc.	
Address:	_____	141 Caspian Court	
	_____	Sunnyvale, CA 94089	
	_____	License Agreement No. _____	

Licensee's Main Contact		Telephone:	_____
Name:	_____	Facsimile:	_____
Email Address:	_____		

Licensee's Contact for Section 2.3 Quarterly Reporting		Telephone:	_____
Name:	_____	Facsimile:	_____
Email Address:	_____		

Products To Be Licensed: Standard Cell Library, Memory Generators and I/O Cells for the TSMC 0.11-, 0.13-, 0.15-, 0.18-, 0.25-micron and 90nm processes.

Ship-To Address (if different from above):

Attention:	_____	Address:	_____

Licensee elects to obtain Support: ____ (yes) or ____ (no). If yes, complete and attach the AccessFirst Support Agreement, AccessBasic Support Addendum, or AccessCustom Support Addendum, as applicable.

This First Page and the attached ARM Artisan Physical IP End User License Agreement Terms and Conditions make up a binding agreement between Licensee and Licensor. The effective date of this Agreement is the date last signed below ("Effective Date").

Accepted and Agreed To:

LICENSEE	LICENSOR
By: _____	By: _____
Name: _____	Name: _____
Title: _____	Title: _____
Telephone: _____	Telephone: _____
Facsimile: _____	Facsimile: _____
E-mail: _____	E-mail: _____
Date: _____	Date: _____

PLEASE COMPLETE ALL OF THE ABOVE. HAVE AN AUTHORIZED REPRESENTATIVE OF YOUR COMPANY SIGN TWO COPIES OF THIS COMPLETED AGREEMENT, AND SEND THE TWO SIGNED COPIES TO THE ABOVE ARM ADDRESS, ATTENTION: END USER LICENSES.

FAQ

Library Contents / Deliverables

- Front-end Views
 - Industry-standard views and models
 - Not included GDSII layout
- Back-end Views
 - Full set of deliverables needed to tape-out design
 - Includes all FE view and GDSII
- For evaluation purpose of application specific products, ARM provides FE views.
