

Highly integrated CMOS media processor & receiver chipset for Mobile Digital TV (MDTV) enabling TV reception in a variety of handheld terminal devices

Mobile TV SOC Functional System Overview

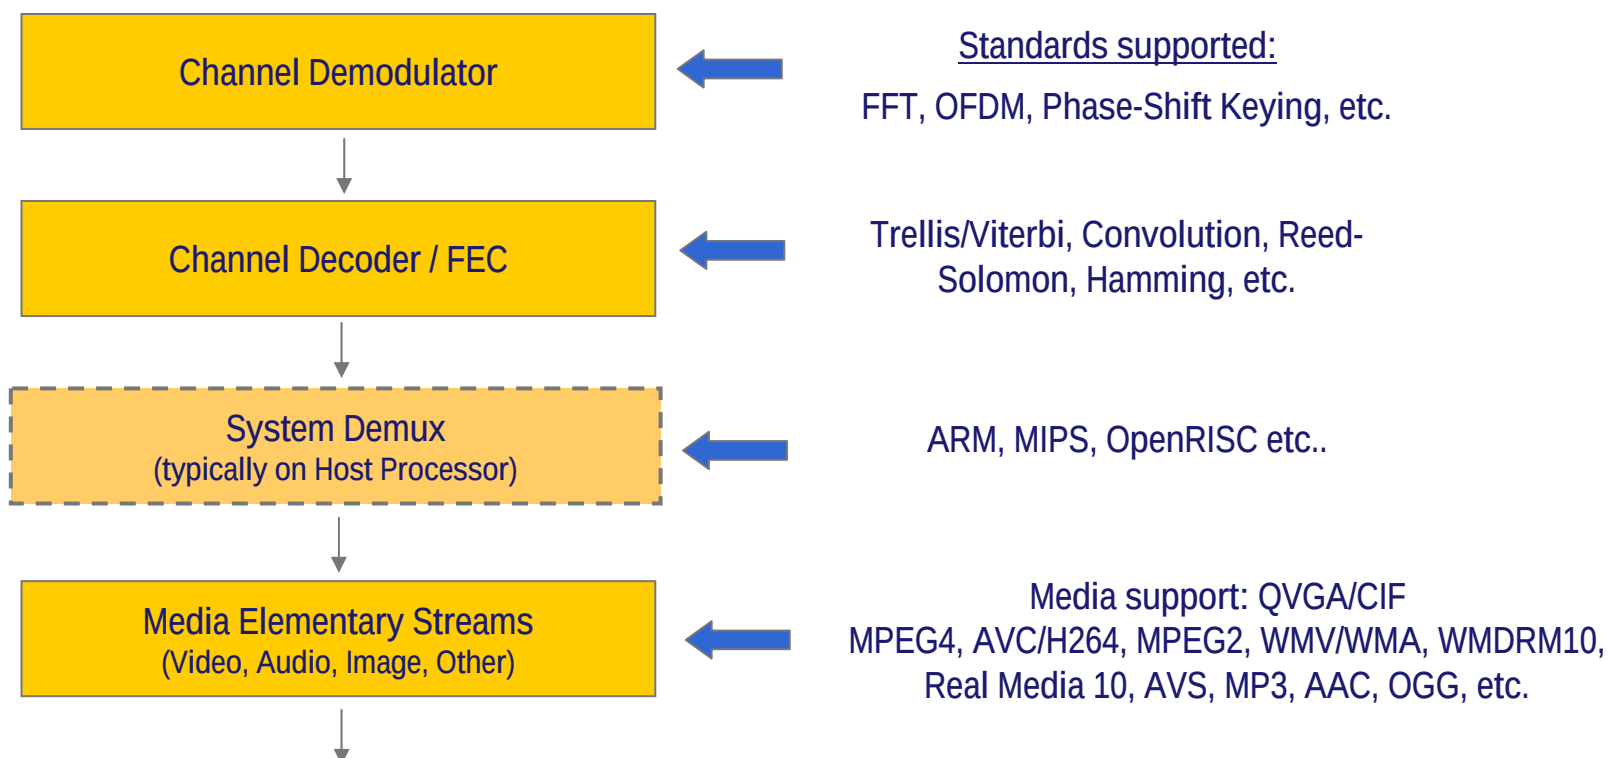

Improv
Systems, Inc.

Mobile TV - SoC

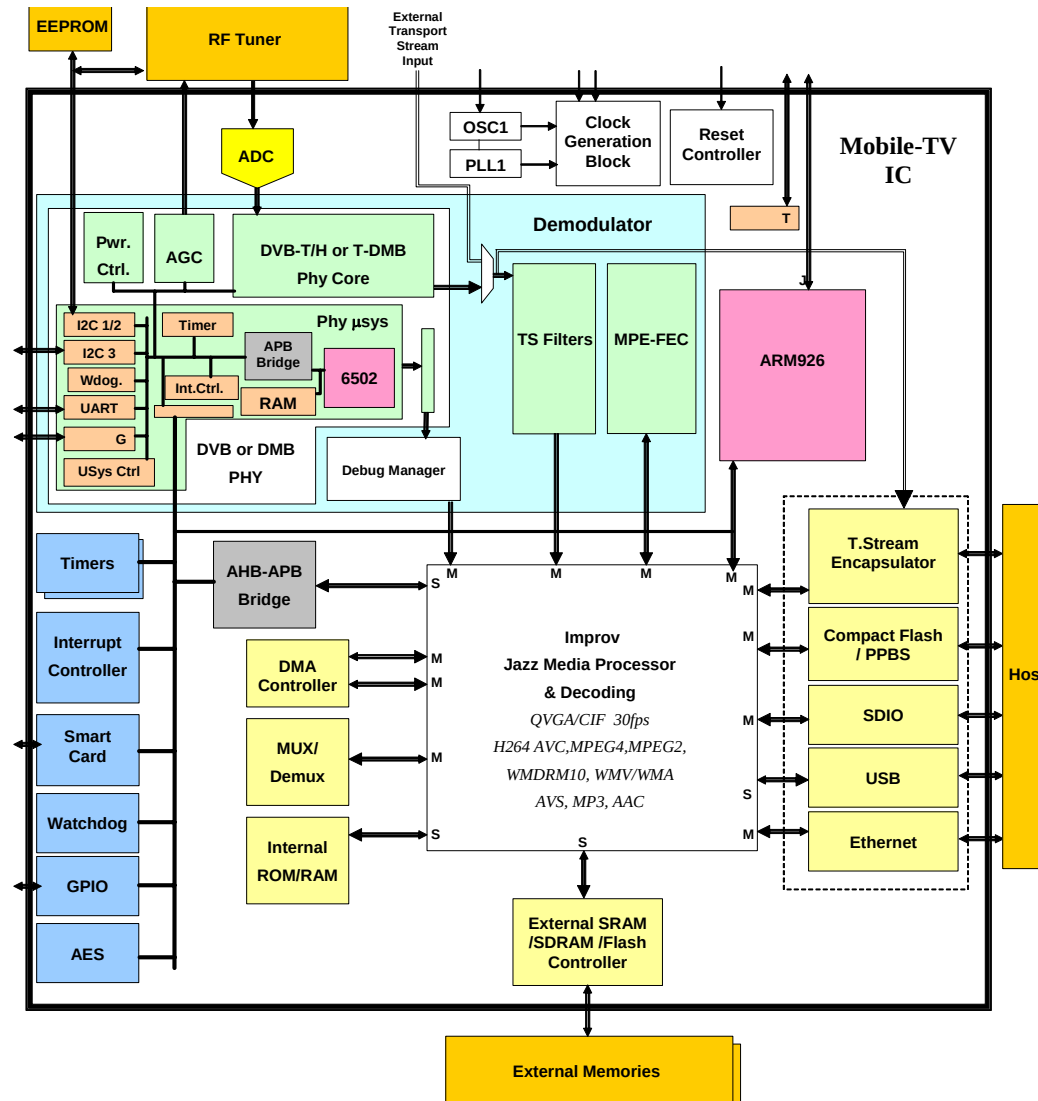

- Advanced Media Processing technology and H/W acceleration support from Improv SoC design reduces total BOM, power overhead and provides system simplification
- **Demodulator and Decoder core based on Improv Systems Jazz DSP technology**

SOC - Example Mobile Digital TV IC

Improv
Systems, Inc.

- Customer can do integration with Improv's Demodulator and Decoder core
